Noise Problems Solved

NEIS-RM25 Noise Cancelling Intercom

Improve patient and clinical staff communication and reduce patient anxiety with bhi's noise cancelling medical intercom system. Designed for demanding healthcare environments, our DSP noise cancelling technology reduces disruptive background noise while preserving clear, intelligible speech.

About Us

bhi Ltd designs and manufactures advanced DSP noise cancelling technology for clear voice communication in challenging environments. Established in 2002, we supply specialist communication solutions worldwide, with products manufactured in the UK to ISO 9001 quality standards.

Why Choose Us

Reduce unwanted noise by up to 98%

Compatible with major radiotherapy and CT equipment

Enhance patient experience & improve clinical efficiency

Easy to retrofit with existing equipment

The bhi NEIS-RM25 is a medical-grade noise cancelling intercom designed for applications including radiotherapy, CT and other treatment environments. The modular system is designed for straightforward integration with existing equipment and flexible installation.
